PROJECTS

Recipe Builder
HTML/CSS/JavaScript/Materialize/Spoonacular API
A website designed to allow the user to input ingredients and get back recipes that use those ingredients. Includes a random recipe and random food joke generator.
URL: https://recipebuilder.github.io/recipe-builder/

Work Day Scheduler
HTML/CSS/JavaScript/Moment
A simple scheduler for the work day that allows the user to input notes into time slots and save them to local storage. Includes day and time tracking features.
URL: https://samibyers.github.io/workday-planner/

Password Generator
HTML/CSS/JavaScript
A random password generator that takes user input in order to craft a custom random password.
URL: https://samibyers.github.io/random_password_generator/
